

7th & 8th Grade Math : Summer AM, 2016

7th & 8th grade Paragon Prep students should have 30 (up to 36) testable AM objectives by August 15 (first day of boot camps – whether you attend or not).

Summer Accelerated Math® Practices will be of the on-line format.

Access to the program:

- Go to <https://hosted57.renlearn.com/240438/homeconnect/>
- Log on using your **User name** and **password**. (If you need help e-mail marilyn@paragonprep.com for this information.)
- Once you have logged in, choose on the upper right **Open Accelerated Math**, using the upper left option click on **Practice: Start**. From here you should be on your way to math success.

You should note that there are resources available if you should need help: worked examples, math glossary, and the links to help videos. Use these as needed.

Below is a link to a video (about 8 min) that shows this in action.

<http://www.renlearn.com/video/video.asp?M=10105&SK=green&T=1&SH=1&V=1&D=1&F=1>

For **maximum success**: Have a **composition book** handy where you are doing your work. Practice organization – **number your problems, be neat with your work**.

AM problems are designed to be done **WITHOUT THE AID OF A CALCULATOR**. You will be tested over these objectives for mastery over the first several weeks of the school year – for your AM tests you will NOT be allowed to use a calculator – so please try to complete your summer Practices in this manner, ensuring maximum success in your testing.

Again – if you have any troubles in using this program please e-mail me for help. marilyn@paragonprep.com

Have a great summer.

Mrs. McA
