

# 2018 Paragon AM Summer Math Assignment

## 3<sup>rd</sup> and 4<sup>th</sup> Grade – Paragon Primary

In order to maintain current math skills and prepare for the upcoming school year, all incoming and returning Paragon Primary 3<sup>rd</sup> and 4<sup>th</sup> graders are **required** to participate in the online Accelerated Math (AM) program. Students will benefit the most by spreading this assignment out over the summer break – that means doing some of the work each week (and not trying to do it all at once). This will be checked periodically from your Math teacher.

Students **must** obtain **testable objectives** by satisfactorily completing **AM Practices** over the course of the summer. Please start in July and finish by the first day of school in August.

AM Goals by the beginning of the school year:

3 <sup>rd</sup>	10 total testable objectives
4 <sup>th</sup>	15 total testable objectives

Thus, you will start the 2018-2019 school year with a number of testable objectives (see chart below for your grade level). Please note that this summer you will be working on **AM Practices**. Only the teacher can print out **AM Tests**, therefore, **no tests** will be printed or taken during the summer. **AM Tests** can only be printed and taken in class on school campus.

All students will be able to access their first **AM Practice** via Home Connect beginning **July 1st**. New students will be given their User Name and Password for Accelerated Math Home Connect.

The program is accessible through the website:

<https://hosted57.renlearn.com/240438/HomeConnect/Login.aspx>

Students will log in using their User Name and Password in order to enter answers and obtain new practice problems.

Note, that if needed, there is now available through Home Connect a math glossary and examples of how to work problems. Please feel free to contact me if you have any questions or difficulties navigating the program.
