

2018 Paragon Summer Math Assignment

5th Grade – Paragon Prep

In order to maintain current math skills and prepare for the upcoming school year, all incoming and returning Paragon Prep 5th graders are **required** to participate in the online Accelerated Math (AM) program. Students will benefit the most by spreading this assignment out over June, July, and August – that means doing some of the work each month. Mr. Cash will be checking your progress periodically.

Students **must** obtain a **baker's dozen number of testable objectives** by satisfactorily completing **AM Practices** over the course of the summer. The goal is **to complete the 13 objectives by the beginning of camp in August.**

Thus, you will start the 2018-2019 school year with 13 testable objectives. Please note that this summer you will be working on **AM Practices**. Only the teacher can print out **AM Tests**, therefore, **no tests** will be printed or taken during the summer. **AM Tests** will be taken during the first few weeks of the Fall Trimester.

All students will be able to access their first **AM Practice** via Home Connect beginning **June 8th**. New students will be given their User Name and Password for Accelerated Math Home Connect.

The program is accessible through the website:
<https://hosted57.renlearn.com/240438/HomeConnect/Login.aspx>
Students will log in using their User Name and Password in order to enter answers and obtain new practice problems.

Note, that if needed, there is now available through Home Connect a math glossary and examples of how to work problems. If you should have problems with the program, e-mail Mr. Cash for assistance.
